THE INFLUENCE OF BORON ON THE DEVELOPMENT OF PLANTS DEPRIVED OF ROOTS, tr. by
Bonnie E. Cushman. 1 June 51, 10p. 3 refs.
Order from LC or SLA mi\$1.80, pb\$1.80

UCRL Trans-106

Trans. of Akademiya Nauk SSSR. Doklady, 1951, v. 77
[no. 6] p. 1115-1118.

Experiments show that the fundamental reason for the inability of rudbeckia plant rosettes, deprived of roots, to form normal shoots, bud and flower under the conditions of a favorable length of day is found in the lack of boron. From a nutrient solution or pure tap water with only traces of boron, rudbeckia plants with roots extracted it in a quantity sufficient for their unhampered growth; plants with the roots cut off took it in inadequately. An increased boron concentration in the nutrient solution or its artificial introduction through the leaves compensated for this deficiency. The neces-
